

Hunaha City Park

Natural Resource Management

Proposals for Consideration

Picture Proposal

Establish 5 photo points within the park. Mark the points with stakes. Take photo point pictures yearly. Catalog the data.

Vegetation Proposal

Plant selected native plant species this spring using island biogeography theory. Monitor survival of plants and record data yearly.

Animal Proposal

Build bird boxes specific for selected bird species and place in the park this spring. Monitor species during the spring and fall. Record the data.

Fish Proposal

Place woody debris and large rocks in the river, consulting the Oregon Department of Fish and Wildlife for proper procedure and regulations.

Water Quality Proposal

Test the water in the Grande Ronde River at Hunaha City Park monthly and record data for the following:

- temperature
- ammonia nitrogen
- dissolved oxygen
- coliform bacteria
